LEADING IN PIPELINE INTEGRITY SERVICES

Alberta NDE & pipeline (**ANP**) has been involved in the pipeline integrity field with highly technical contributions since 2006. We are leaders in the channel of knowledge and best practices through highly dedicated staff, which is as relevant pipeline industry association committee members for either technical conferences or topical seminars.

In the past ten years, our engineers have solved many high-impact and complex pipeline integrity problems by understanding their fundamental underpinnings and mechanisms by the most cost-effective solutions.

LOCAL NDT INSPECTION & SUPPLIES

Established in Calgary, Western Canada, **ANP** is conveniently located close to Alberta Pipelines and other Infrastructure, enabling us to provide prompt NDT inspection service and deliver NDT supplies.

We are authorized distributors for SIUI in North America, a key China high-tech corporation with State certificated Corporate Technology Center. This gives us direct access to technical product support and research and development departments.

We have been providing the highest quality Ultrasonic Test (UT) parts with an unwavering commitment to customer satisfaction and peace of mind across the whole country.

LATEST PRODUCTS

ANP is at the forefront of ever-changing NDT technologies. There have been many advances in UT products over the years, from high-end Phased Array & TOFT Flaw detector to advanced data analysis software; we take a leadership role in procuring the latest NDT available today, ensuring that our products are available are guaranteed top quality or better.

NDT SUPPLY CUSTOMERS

Our customer base comprises many large NDT inspection companies across Asia, Europe, and North America Internationally.
